EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312.

To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gerald McGlynn on 4-8-05.

2. The application has been amended as follows:

-- Cancel claim(s) 12.

-- Insert newly amended Claim 1 as follows:

Claim 1 (Second Time Amended) In a motor vehicle having a ceiling and a passenger seating area, a dockable connection assembly for a display screen comprising:

a retainer assembly;

a connector assembly adapted for pivotal and rotational attachment of the display screen and to disengage from the display screen during emergency situations; and

a harness assembly adapted for establishing an electrical connection with the display screen, said harness assembly extending through said connector assembly;

wherein said retainer assembly includes a tube connector and said connector assembly includes a snap nut threadably attached to said tube connector, wherein said harness assembly runs through said retainer assembly and said connector assembly, wherein said harness assembly

Art Unit: 2833

is adapted to establish the electrical connection with the display screen as said snap nut is threaded onto said tube connector, and is also adapted to disengage from said electrical connection with the display screen when said snap nut is unscrewed from said tube connector.--

3. The following is an examiner's statement of reasons for allowance:

- The following is a statement of reasons for the indication of allowable subject matter: The prior art does not show a connector assembly having a snap nut threadably attached to a tube connector and is also adapted to disengage from a display screen during emergency situations, a harness assembly that runs through both the connector assembly and a retainer assembly, the harness assembly is adapted to establish an electrical connection with the display screen as the snap nut is threaded onto the tube connector in combination with all the other elements of the claim and the examiner knows of no permissible motivation to combine the prior art such that the subject matter as a whole would have been obvious at the time the invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The following is an examiner's summary of the interview: During the interview, it was agreed that it would not be obvious to combine prior art because of the claimed orientation, location, and structure of the claimed retainer, connector, and harness assemblies.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R. Harvey whose telephone number is 571-272-2007. The examiner can normally be reached on 8:00 A.M. To 5:00 P.M.
